Our Redback boot sizing is provided in standard UK size format, on our website. Therefore, if you normally wear a UK size 9, then please order a UK size 9. Yes, Redback boots are generously proportioned! This means you can wear a thick, warm pair of socks under your boots without any problems.

Please note, Redback boot half sizes (e.g. 9.5) are an extra width fitting. Each half size is 5mm wider than its whole size counter-part but not longer.

Redback boots are supplied in a standard "G" width fitting.
